Sprint 1 Plan

Vitae | Jan 14-27, 2026 | Revision #1 | Last Modified: 2026-01-27

Goals

Users can maintain one canonical record of their career history, never having to retype experience across multiple documents. Users should also be able to sign in and have their data associated with their account.

User Stories + Task Assignments

1. Sign In (2 points): As a user, I can sign in so that I can access my data.
    1.1. Setup authentication provider with Clerk (1 hour) Berat Ercevik
    1.2. Design the Create Account page UI with “Sign in with Google” button (1.5 hours) Omer Boztepe
    1.3. Handle OAuth callback with and session creation with Clerk (1 hour) Berat Ercevik
    1.4. Design the user database schema and initialize it (2 hours) Alex Lio

Total hours for user story 1: 5.5 hours

---

2. Session Persistence (2 points): As a user, I want to stay logged in across browser sessions so that I don’t have to sign in every time.
    2.1. Implement session persistence (0.5 hour) Berat Ercevik
    2.2. Add protected route logic - redirect to login page if not authenticated (0.5 hours) Berat Ercevik
    2.3. Display persisted (mock) data based on user (1.5 hours) Omer Boztepe
    2.4. Implement logout functionality (0.5 hours) Berat Ercevik

Total hours for user story 2: 3 hours

---

3. Add Canon Items (6 points): As a job applicant, I need to be able to enter my entire career history so that I can draw from it when making resumes.
    3.1. Define canon item types and fields (1 hour) Njeri Gachoka
    3.2. Define database schema for canon_items table (2 hours) Njeri Gachoka
    3.3. Design “Add Item” form UI with type selector (1 hour) Keith Tran

3.4. Implement dynamic form fields depending on item type (1 hour) Keith Tran
3.5. Create API endpoint (POST /canon) (1 hour) Keith Tran
3.6. Connect endpoint to form (0.5 hours) Njeri Gachoka
3.7. Handle errors (1 hour) Njeri Gachoka
3.8. Design Database query (1 hour) Alex Lio
3.9. Initialize Database Schemas (2.5 hours) Alex Lio

Total hours for user story 3: 11 hours

---

4. Edit Canon Items (4 points): As a job applicant, I need to be able to edit my career history so that I can correct errors.
   4.1. Design “Edit Item” form UI (1 hour) Keith Tran
   4.2. Create API endpoint (PUT /canon/:item-id) (1 hour) Berat Ercevik
   4.3. Connect endpoint to form updates (0.5 hours) Omer Boztepe
   4.4. Design Database query (1 hour) Alex Lio

Total hours for user story 4: 3.5 hours

---

5. Deleting Canon Items (2 points): As a job applicant, I can delete career history items so that I can keep my records accurate.
   5.1. Design “Delete Item” form UI (1 hour) Keith Tran
   5.2. Create API endpoint (DELETE /canon/:item-id) (1 hour) Njeri Gachoka
   5.3. Connect endpoint to form updates (0.5 hours) Njeri Gachoka
   5.4. Design Database query (1 hour) Alex Lio

Total hours for user story 5: 3.5 hours

---

6. Viewing Canon Items (4 points): As a job applicant, I need to save and view my entire career history so that I can refer back to it at any time.
   6.1. Design Canon view UI with items grouped by type (1 hour) Keith Tran
   6.2. Create API endpoint (GET /canon) (1 hour) Njeri Gachoka
   6.3. Implement Canon list view with data fetching (1 hour) Berat Ercevik
   6.4. Handle Canon with no items yet (0.5 hours) Keith Tran
   6.5. Design Database query (1 hour) Alex Lio

Total hours for user story 6: 4.5 hours

Role Assignments

Njeri Gachoka - Developer, Product Owner
Keith Tran - Developer, Scrum Master
Alex Lio - Developer
Berat Ercevik - Developer
Omer Boztepe - Developer

Initial Task Assignments
